WFK600	600w	43.1	WFK2500	2500w 184.6
WFK650	650w	48.1	WFK3000	3000w 219.1
WFK700	700w	51.7		

Select the appropriate kit with the help of our online sizing calculator.

Each Warmfloor Heating Kit contains: Cable, Cloth Tape, Spray Adhesive, Cable Monitor and Installation Manual.

The thermostat is not included in the kit. Choose the thermostat you require from our range and order as a separate item.

Warmfloor Approved Installations

Warmfloor approved installers have been specifically chosen and trained so as to be able to offer a comprehensive warranty.

Should the heating element fail within a 25 year period then the element will be repaired or replaced with your surface reinstated back to original condition.

The 25 year period extends to the cable only, with five years for the thermostat. Conditions apply, see website for details.

Programmable Thermostat - WFTH1

Warmfloor's unique Energy Indicator

TH1 and TH3 Energy Usage Indicator

By adjusting your settings it is possible to view power used over a time period. Reset the indicator and view the new power usage. This is a unique way of obtaining the best results from your heating system.

Warmfloor Energy TH1 Smart Controller

Features:

- Seven Day, Two Heating Periods
- Air and Floor Sensing
- Auxiliary Output for Heated Towel Rail Control
- Power Usage Indication
- 16 Amp Relay
- Two Sensor Probes (One Spare)
- White only
- Battery Free

Manual Thermostat - WFTH2

Features:

- Simple to Operate
- Maintains Set Temperature 24 hours per day
- Air and Floor Sensing
- White only
- Two Sensor Probes (One Spare)
- Interchangeable with TH1 Thermostat
- Power On Indication
- Heating Active Indication

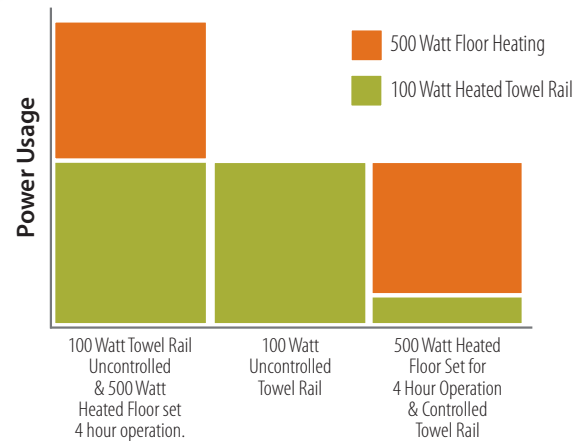

Save Energy with Warmfloor

Save on energy using the Warmfloor controllers heated towel rail function

Manage Your Power Usage

By controlling the heated towel rail to only when it is needed (typically 4 hours a day), a 500 watt heated floor will not increase current power usage.

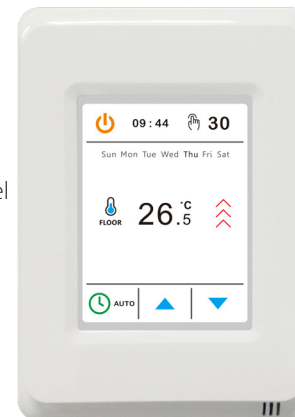

Touchscreen Thermostat - WFTH3

Warmfloor Energy TH3 Smart Controller

Features:

- Seven Day, Two Heating Periods
- Air and Floor Sensing
- Auxiliary Output for Heated Towel Rail Control
- Power Usage Indicator Graph
- 16 Amp Relay
- Two Sensor Probes (One Spare)
- White, Black and Satin Options
- Battery Free

Online Cable Sizing Calculator

Using the Warmfloor website cable sizing calculator you can quickly find the cable size you require for your installation.

Simply, select which climate zone you are in, name your room and add the floor area to be heated and we can show you which cable size you require.
