New Zealand underfloor radiant heating solution

Designed for both Domestic and Commercial use. For all new builds and renovations.

Why choose the Warmfloor Brand?

The TH05 Wifi 5th Generation Touch Screen thermostat has been designed by Warmfloor to be the most advanced thermostat available – pick up a brochure for more details on our thermostat range or view our website

New Zealand made heating element offering you complete peace of mind with its high-quality manufacturing and compliancy to the NZ Safety standard requirements.

Warmfloor is committed to reducing the running costs of your heating system:

Combine the following benefits of installing Warmfloor:

- Allowing our TH05 thermostat to control your heated towel rail (running this 24/7 is costly)
- Using our online Sizing calculator to ensure installations have the adequate power installed to reduce heat up times (especially beneficial in colder climate zones)
- Installing Warmfloor Insul-board which can save you up to 60% of your running costs especially in colder climate zones and offers much faster heat up times.

The Warmfloor TH05 WiFi 5th Generation Touch Screen Thermostat is the most advanced model available and ideal for both residential and commercial accommodation needs.

New Zealand designed for New Zealand conditions

Warmfloor Electric Radiant Heating is a New Zealand made Product for New Zealand homes.

When installing Radiant Heating you can enjoy many benefits. More efficient than forced air heating as it eliminates duct losses and gives added benefits of zero noise emission.

Radiant Heating is recommended by health professionals especially for Asthma and Allergy sufferers.

Maybe the best part of all is saying goodbye to those Cold feet on wintery days when stepping on surfaces such as tiles, laminates and the like.

The Warmfloor TH05 WiFi 5th Generation Touch Screen Thermostat offers a free phone app option for management from any location.

Installation Costs & Maintenance Costs

Installing a Warmfloor system invariably becomes a more cost effective option than other heating systems such as hydronic, ducted gas and heat pumps. Unlike these other heating sources Warmfloor cables will never require any maintenance and have an expected life span of over 100 years.

The capital cost savings could be used to install solar panels to save the planet.
